WAJADTUHA CASHLESS

Our payment system for students is a game-changer in the world of education. By combining cutting-edge facial recognition technology with traditional card payment methods, we have created a system that is convenient, secure, and efficient. With our payment system, students can easily pay for meals, using their face or a special RFID student card. Our facial recognition technology is highly accurate and reliable, allowing students to quickly and easily make purchases without the need for cash or a physical card. The process is simple - students simply look into the camera, and our system does the rest, the system will detect the required amount from there balance.
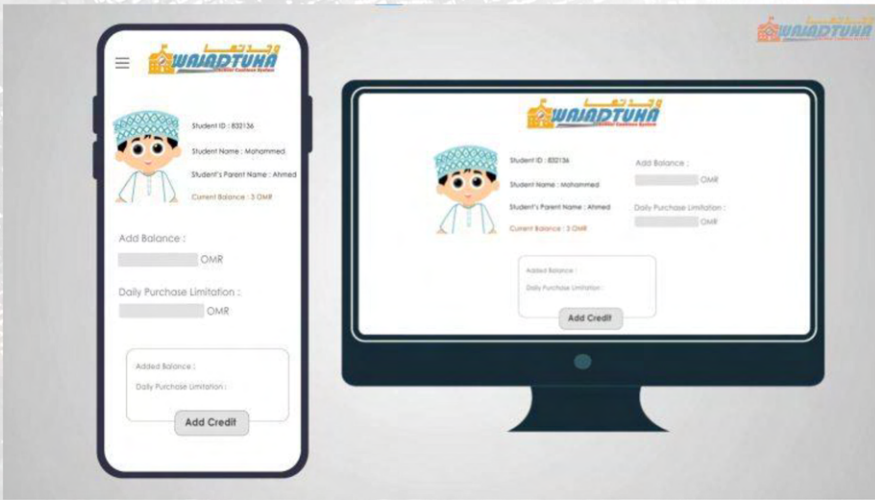

POINT OF SALE

GST provides one of the most reliable and durable point of sale (POS).
At the point of sale, the merchant would prepare an invoice for the customer (which may be a cash REGISTER printout) or otherwise calculate the amount owed by the customer and provide options for the customer to make payment. After receiving payment, the merchant will also normally issue a receipt for the TRANSACTION. Usually the receipt is printed, but it is increasingly being dispensed electronically.

INTEGRATION

Unlock the full potential of your business with our seamless Integration Solutions. We understand that in today's interconnected world, efficient communication and data flow between systems is paramount for success. Our Integration Solutions empower you to effortlessly connect and synchronize your disparate applications, platforms, and databases, enabling smooth collaboration, streamlined processes, and enhanced productivity. Our Integration Solutions are designed to adapt to your unique business requirements, ensuring a tailor-made solution that aligns with your goals.

CONSULTANCY

Stay ahead of the curve with our Tech Consultancy Solution. In today's fast-paced and ever-evolving technology landscape, businesses need expert guidance to navigate the complexities and leverage the latest innovations. Our team of seasoned technology consultants is dedicated to understanding your unique business needs and providing strategic advice and solutions that drive growth and maximize your technological investments. With our Tech Consultancy Solution, you gain access to a wealth of industry knowledge and expertise. Our consultants stay at the forefront of emerging technologies and industry trends, ensuring that you receive up-to-date insights and recommendations.

SOFTWARE DEVELOPMENT AND WEB DESIGNING

Software development can be a collaborative effort involving software developers, designers, testers, project managers, and other specialists. It's used to create a wide range of applications, from simple mobile apps to complex enterprise systems, and it plays a crucial role in today's digital world, powering everything from websites and games to business software and embedded systems.

Creation of websites and pages to reflect a company's brand and information and ensure a user-friendly experience. Our experts boost your company's success by achieving your company website requirements.
